SUBJECT: Letter of Reference

Marc Diament Architecture PC

I have had the privilege of working with Mr. Diament and his staff, most recently, on our Central High School Project. His selection as our Architect for this project was competitive and founded on his proposed process and product. His understanding of school district requirements, options and scheduling needs were critical in achievement of our functional and budgetary goals. His fee was competitive considering the full spectrum of services and the potential changes avoided. Marc and his Consultants provide us real value-added design services.

Marc has the unique ability to organize a professional team and orchestrate the total process including concept, schedule, design, approvals, bidding, construction, and close-out. Mr. Diament was adept at controlling the scope and costs for our multi-faceted project. We always knew Mr. Diament held our School District's goals and objectives paramount throughout the project life cycle.. He was extremely adaptive in embracing our "way of doing business". His ability and patience in working with our demanding "end users" was always exemplary. As the owner's representative I relied heavily on Marc's thoroughness and attention to details.

It is with great pleasure that I provide this very positive Letter of Reference for Marc Diament Architecture PC. It is with confidence that I recommend this trustworthy firm. Please do not hesitate calling me if you desire more information or have questions.

Sincerely,

Keith Bentzen
