Dear Marc:

I am writing to express my gratitude for all your efforts on behalf of The Logan School for Creative Learning. As you know, during the last four years I have been privileged to serve as the President and Chairman of the Board. During that time we have seen great accomplishments, including the completion of a design for a new Logan campus.

When we first contacted you and asked for a proposal, we were inexperienced with such an ambitious undertaking. We thought that a little renovation was all that would be needed. Boy were we wrong. Through your patience and guidance we went through a detailed survey of staff and parents to determine what functions were currently being conducted in our building and what functions needed to be added in the new site. Your thorough, detailed approach to this first phase ensured we had the maximum commitment from the Logan community. I know the discussions were not always easy. Your even tempered approach allowed all to be heard; not an easy task in our culture.

When it came time to actually develop a detailed construction plan and budget, you again provided excellent service. The completion of the drawings and a design within our very tight budget constraints is most appreciated. We are now poised to complete fundraising and start construction. We would not be at this level without your efforts in dealing with the Building department and the various players on the Lowry "scene".

Lastly, let me compliment you on your documentation. In a volunteer environment like Logan, it is important to have a good trail as to what has been done and why. Your frequent memos and updates provide such a record and were useful to me in being able to monitor project progress while not actually being an active member of the Construction Committee.

I wish you the best of luck in future engagements and encourage you to use my name as a reference with other potential clients.

Very truly yours,

Kevin M. Smith
