I am writing this letter on behalf of Marc Diament Architecture.

I know Marc from working with him on a historical structural report for the Frontier School in Elizabeth, Colorado. At that time I was facilities manager for the Elbert County School District. Marc was recommended to me by one of our contractors, and the recommendation turned out to be a good one.

I enjoyed working with Marc because he really put a dedicated effort into helping us understand this historic building. He did the historic research and building investigation. But, in addition, he also participated with me and many other residents of the town in talking about the history of the building, what it has meant to our citizens, and what they would like to see happen with the building.

While working with us on the report, Marc also gave his time to help me, my staff, and the superintendent out with other facilities related questions. Some of these were about our plans for the Frontier School, but Marc was also available to talk with us about other facility problems throughout our district.

Even after the assessment was done he stayed in touch with us to see how it plans for the building might develop. The district has continued to work with him in thinking out what will happen with the Frontier School as well as some of the other buildings in the district.

Marc is a pleasure to work with; he is diligent, and knowledgeable. I do recommend Marc Diament Architecture to you for your projects.

Yours very truly,

Mike Drake
