Marc

I am writing this letter to thank you for all your hard work of the Star school project and for your help with historic rehabilitation in southeastern Colorado. I hope you will use this letter as a reference for your company. I continue to value our working together and hope that others will recognize the value of the service at your company provides.

First, I do want to express my appreciation for the fact that you have really been able to help us look at the Star school project in a bigger way and we would have been able to do on our own. You have done this in many ways:

You have helped us see the project as something that could be more than just a building fix up and can serve as a gateway/visitor center for our whole area. Your suggestions have really rung true with many of our supporters in the area who now see the opportunity of this project in a way they could not have seen it before. That, of course has also had a positive impact on how we think about funding for the project -- it has created a lot more opportunity for us.

In your work on the Star School historic structure assessment, all of us were impressed with the thoroughness of your investigation and the completeness of the document. We understand that a lot of the detail that you provided to us is not required by the funding agency, but you nevertheless provided that information because it was in the interests of our project. It has been particularly important to our community that you spent so much time interviewing some of our senior citizens who attended the Star school.

Finally, I appreciate the fact that you have stayed with us over the long haul for this project. You have already worked us for years it seems, most of that time without commission or compensation. You have stuck with us to thick and thin, hope and delay. We've always known that you would be there for us and for this project.

I look forward to working with you on the next phase and future phases of the Star school project.

Yours sincerely,

Pat Palmer
